Hecter Agri Tech is a private limited company registered under the Somalia Companies Act of 2018. Our core business activities include crop farming, livestock farming, greenhouse and irrigation installation, consultancy, trading of agriculture products, and other agriculture-related services.

Our headquarters and operations are located in Mogadishu.

Our Mission

To attain sustainable production and supply ability throughout the year by enhancing small-scale farmers' abilities to use land effectively and providing consumers and small-scale farmers with a reliable market for high-quality farm products.

Our Vision

to lead the way towards eradicating famine in Somalia and throughout the world by improving farmland productivity and the nutritional value of food produced while preserving and enhancing the environment.

Our Objectives

To provide employment opportunities for youth and contribute to their personal and professional growth.

To meet market demand for high-quality agricultural products through sustainable and efficient farming practices.

To explore innovative and effective ways of conducting agricultural trade to benefit the company and its stakeholders.

Our Services

Our target audience comprises farmers throughout Somalia, particularly those who are seeking innovative farming methods and modern production techniques. Our company operates within the Department of Agriculture and Livestock in Somalia, and we specialize in the provision of organic seeds, fertilizers, and modern agricultural equipment, such as greenhouses and various irrigation systems.

What sets us apart from other businesses is our five years of experience in managing and implementing successful agricultural practices. Our team consists of trained professionals who are committed to ensuring the highest levels of productivity and quality for our clients.

- **Crop farming**
Hecter Agri Tech offers crop farming services that involve the production of various crops.
- **Livestock farming**
Hecter Agri Tech specializes in livestock farming, which includes breeding, feeding, and management of various livestock animals.
- **Greenhouse installation**
Hecter Agri Tech provides modern greenhouse installation services that are designed to improve crop production and promote efficient use of resources.
- **Irrigation installation**
Hecter Agri Tech offers irrigation installation services that ensure that crops receive sufficient water, especially during dry seasons.
- **Consultancy**
We provide consultancy services that are designed to help farmers improve their agricultural practices, increase their crop yields, and reduce their costs.
- **Trading of agricultural products**
Hecter Agri Tech engages in the trading of various agricultural products, including crops, livestock, and agricultural equipment.

We also provide a range of other agriculture-related services, such as soil testing, pest control, and farm management, among others.

01. Crop Farming

Our team specializes in crop farming and has a wealth of experience in the industry. We use modern farming techniques and equipment to ensure that our crops are of the highest quality.

Our crop farming service is aimed at enhancing food security in Somalia and increasing the income of small-scale farmers. We help our clients to identify the best crop options for their land, and provide ongoing support throughout the planting and harvesting process. Our focus on sustainable farming practices ensures that our crops are grown in an environmentally friendly way, without compromising on quality or yield.

02. Livestock Farming

We are committed to helping farmers across Somalia to maximize their livestock production.

Our livestock farming service includes animal husbandry, breeding, feeding and disease control. We use modern techniques and equipment to ensure that our livestock is healthy and well-cared for, resulting in high-quality meat, milk, and other products.

We provide ongoing support and advice to farmers to ensure that their livestock farming operations are sustainable and profitable.

03. Greenhouse Installation

Our greenhouse installation service is designed to help farmers grow crops in a controlled environment, providing protection from harsh weather conditions and pests.

We offer a range of greenhouse options to suit the specific needs of our clients. We assess your land and advise on the best location and type of greenhouse to install. We use high-quality materials and equipment to ensure that our greenhouses are durable and effective in enhancing crop yields.

Our team of experts designs and installs efficient irrigation systems that optimize crop growth and yield while reducing water waste.

We use the latest technology and equipment to ensure the durability and effectiveness of our irrigation systems, enabling farmers to get the most out of their land.

04. Irrigation Installation

We understand the importance of efficient irrigation systems in achieving high crop yields. We offer irrigation installation services that are tailored to meet the specific needs of our clients.

We will assess your land and recommend the most suitable irrigation system, taking into consideration factors such as soil type, crop type, and climate. We use modern equipment and techniques to ensure that our irrigation systems are efficient and sustainable.

05. Consultancy

Our consultancy service provides farmers with expert advice and guidance on a wide range of agricultural issues. Our team of consultants has years of experience in the industry and is equipped with the knowledge and expertise to help farmers overcome challenges and maximize their productivity.

We offer a range of consultancy services, including crop selection, soil analysis, market research, and business planning.

06. Agri-Trading

At Hecter Agri Tech, we are committed to connecting farmers with reliable markets for their products. Our trading service provides farmers with access to both local and international markets, ensuring that their products reach the widest possible audience. We ensure that their products meet the highest quality standards and that they receive a fair price for their hard work.

Environmental Sustainability

We are committed to sustainable farming practices that protect the environment while maximizing productivity.

We work closely with our clients to ensure that their farming practices are environmentally friendly, taking into consideration factors such as soil health, water usage, and waste management. Our team of experts provide ongoing support and guidance to farmers to ensure that their operations are sustainable and profitable.

Customer Satisfaction

We are committed to providing our clients with the highest levels of customer service. We understand the challenges that farmers face and we are dedicated to providing practical solutions and support that meets their needs.

Our team of experts is always available to answer questions, provide advice, and offer guidance to ensure that our clients are satisfied with our services.

We pride ourselves on our ability to build long-lasting relationships with our clients and to support them throughout their agricultural journey.

We believe that customer satisfaction is the key to our success, and we strive to exceed our clients' expectations in every aspect of our business. From the initial consultation to the final installation, we work closely with our clients to ensure that their needs are met and their goals are achieved.
